

Start of Survey

We at the Freshwater Collaborative of Wisconsin thank you for supporting Wisconsin's water systems and communities! We recognize your research and development as key practices that address freshwater challenges and engage the future water workforce.

The data report you are about to fill out will help us understand the activities in the final year of your award and the outcomes of your project overall. Please answer the questions with as much detail as possible. If you close out of the report, your progress will be saved so that you can complete the information in more than one session using the same link.

For questions about this data report, please email rfp-questions@uwm.edu

Project Narratives

The mission of the Freshwater Collaborative is to apply the power of the thirteen University of Wisconsin institutions and the Wisconsin Idea to lead the global community in addressing freshwater challenges. The Freshwater Collaborative furthers its mission by supporting:

1. The creation of knowledge to solve freshwater challenges through collaborative research across all

- academic arenas, such as natural and applied sciences, engineering, economics, social sciences, arts, humanities, and policy;
- 2. Recruitment and development of talented professionals across all freshwater arenas through intentional structuring of curriculum, training, and workplace experiences; and,
- 3. The improved the well-being of natural ecosystems and all people by applying research and training to engage and serve communities and solve freshwater challenges.

Please describe how your project contributed to this mission

Describe how has this project linked economic and workforce development with higher education.

Are there any students or projects we can feature in testimonials, Freshwater Collaborative media, and communication with Freshwater Collaborative partners? Please include the name and email of the student or the name and email of the project coordinator.
